## **DETAILED ACTION**

### ***Examiner's Statement of Reasons for Allowance***

Claims 1-10 are allowed. The following is an examiner's statement of reasons for allowance. Derbyshire et al. (US 4,404,177) teaches a method of preparation for graphite, comprising a step of contacting a Group VIII metal with carbon monoxide or carbon dioxide. See col. 3-4. Another reference, Hammond et al. (US 4,030,965), teaches crystal growth comprising a step of contacting alkali halides with carbon dioxide. See col. 4-6. A third reference, Wentorf (US 2,947,617), teaches a method for the preparation for cubic boron nitride comprising a step of contacting an alkali or alkaline earth metal. See col. 1. However, there would be no reason to combine the above references without hindsight.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
